

# FRANKE PRO-VALUE RANGE

Designed with quality and value in mind

KITCHEN  
SYSTEMS

**FRANKE**

FRANKE

## **THE FRANKE PRO-VALUE RANGE – DESIGNED WITH QUALITY AND VALUE IN MIND**

The Franke Pro-Value range features a level of craftsmanship that has been gained through almost a century of experience in manufacturing kitchen products. Founded in Switzerland in 1911, Franke has grown to become the world's largest manufacturer of kitchen sinks. We're also an industry leader in design, quality and innovation – pioneering research and developing new materials and products for the kitchen.

[www.franke.co.uk](http://www.franke.co.uk)

---

## WITH THE PRO-VALUE RANGE, WE OFFER WORLD-RENOWNED FRANKE QUALITY AT SURPRISINGLY AFFORDABLE PRICES

---

A comprehensive choice of innovative Franke sink designs in a wide range of materials, shapes and sizes; all with elegant taps that fully complement each style – from cutting edge contemporary to modern classics.

### **Exceptional value with no compromise in Franke excellence**

Efficient and economic manufacturing facilities allow us to offer competitively priced products with all the build quality for which Franke is famous. Franke have maintained the high standards of design, production and high-grade materials. The biggest difference is in the cost to you.

### **About Propacks**

To make your choice easier, we've devised affordable Propacks that provide a perfect partnership of sink and tap. However, we want to offer you as much flexibility as possible, so each page will also suggest another complementary tap upgrade to allow you to achieve a look that's perfect for your kitchen. Some are also available with matching accessory packs (Accpacks) that transform your sink into a versatile work area.

### **Peace of mind with Franke quality**

We have absolute confidence in the unparalleled quality of our sinks. That's why we offer a 50 year guarantee against any manufacturing defects.

## Stainless Steel Sinks

Franke manufacture sinks using only premium quality chrome nickel steel. Not only does it look exquisite, it's thoroughly resistant to staining, chipping, rust and corrosion, as well as being exceptionally hygienic.

## Ceramic Sinks

Made from kiln-fired porcelain, Ceramic Franke sinks have a smooth high-gloss finish that's remarkably durable. It's tough enough to withstand the harshest treatment – so even after many years of loyal service, your sink can still look as good as the day you bought it.

## Fragranite Sinks

An exceptionally tough material that's highly resistant to burns, dents chips and stains. Fraganite was pioneered by Franke and contains 80% granite to form a unique material with a subtle sheen that's warm to the touch.

### DuraKleen® Plus

Revolutionary new DuraKleen® Plus technology is now available on all Franke Fraganite and SilkSheen Fraganite sinks, which now enjoy ultra-smooth surfaces that are exceptionally easy to keep clean.

## Taps

As the element of the sink that gets used the most, the choice of tap is paramount. The Pro-Value Range boasts the high quality Zurich tap as standard, combining classic looks with rugged durability. There is also a wide range of taps available as an upgrade, to offer you maximum flexibility when designing your kitchen.

## FRANKE G-CLIPS

### The next-generation installation system

The patented Franke G-clip system is a revolution in the installation of undermounted sinks, with considerable savings. With this system you will see no visible difference from traditional fixing methods, whilst gaining the benefits of less installation time and effort required. The innovative technology distributes weight from the sink bowl laterally through the use of simple metal clamps that can be fitted in minutes and are strong enough to withstand more than a 100kg weight. The application of sealant ensures a watertight seal, with the G-clip system firmly holding the sink in place. G-clips can easily be removed with a simple tap from a hammer. For more information and demonstration video visit [www.franke.co.uk/gclip](http://www.franke.co.uk/gclip)

## FRANKE ROLLAMAT

### Truly versatile, the Franke Rollamat is an essential accessory for every kitchen

This multi-purpose item can help protect sink and kitchen surfaces and is extremely useful for hot pans, heavy objects and for defrosting food items. It also provides the ideal draining surface for modern flat draining areas on minimalist sinks and can be easily rolled up and conveniently stored away after use. This flexible little helper is dishwasher safe and will be a welcome addition to any hardworking kitchen.

Protects surfaces from hot pans and heavy objects.

Ideal draining surface for minimalist sinks.

For a triple bowl sink
£27.21

NEW

# WASTE DISPOSAL UNITS

A choice of four units designed to free the kitchen of unsightly and unhygienic organic household waste. Each unit is the essential add-on for ensuring that all Franke appliances and work surfaces remain looking immaculate.

Thanks to a unique, permanent magnet motor, they reach high speed in a split second, producing more torque per kilo than any other of its type. Whilst running water through the unit, food waste is instantly liquefied into fine particles that are easily flushed through the pipework system.

(1) Ceramic disc tap – may require a 4 metre head of water in a conventional plumbing system. (2) Compression valve tap – usually suitable for any plumbing system. In some instances, pull-out nozzle and spray taps may require additional pumping or local authority approval prior to installation.

Franke strongly recommends that you consult your supplier/installer prior to purchase.

The figure in the symbol is designed to indicate the relative flow rate performance for each tap. The rate is graded 1-8 where 1 is poor and 8 is excellent. Relative flow rates are only likely to be relevant in installations with a low head of water (below 4 metres) or low cold supply pressure. In either case you would be well advised to consult your supplier or installer.

All Franke taps are designed to conform to Water Research Council requirements and are backed by nationwide servicing and guarantees.

Indicates tap is fitted with a Perlator® providing a champagne-like flow.

--	--	--

(1) Ceramic disc tap – may require a 4 metre head of water in a conventional plumbing system. (2) Compression valve tap – usually suitable for any plumbing system. In some instances, pull-out nozzle and spray taps may require additional pumping or local authority approval prior to installation.

Franke strongly recommends that you consult your supplier/installer prior to purchase.

1 The figure in the symbol is designed to indicate the relative flow rate performance for each tap. The rate is graded 1-8 where 1 is poor and 8 is excellent. Relative flow rates are only likely to be relevant in installations with a low head of water (below 4 metres) or low cold supply pressure. In either case you would be well advised to consult your supplier or installer.

All Franke taps are designed to conform to Water Research Council requirements and are backed by nationwide servicing and guarantees.

P Indicates tap is fitted with a Perlator® providing a champagne-like flow.

## Franke product brochures all downloadable from [www.franke.co.uk](http://www.franke.co.uk)

A wealth of Franke expertise and information is available to you via our extensive suite of brochures. They will inform and inspire you – request yours today.

### Specialist Range Brochure

994.0155.990

This is the signature Franke range – featuring the most desirable Franke sinks and taps available. All the products in this range have been designed, styled and built to the finest quality.

Downloadable and available on request

### Decorative Hoods Brochure

994.0155.991

All the Franke hoods in one brochure – high performance appliances with precision engineering. Franke hoods make a stunning addition to any modern kitchen.

Downloadable and available on request

All brochures are downloadable from [www.franke.co.uk](http://www.franke.co.uk) or phone the consumer brochure line **0161 436 0209** to get your copy now.

Colours shown are for reference only. All sinks available with left or right hand drainer. The description 'reversible' means that the design enables the same sink to be turned to drainer on the left or drainer on the right. In the case of a 'handed' sink it is necessary to specify which side the drainer is required e.g. EUX 651 left hand drainer or EUX 621 right hand drainer. All bowl sizes and dimensions are described in mm.

In line with the environmentally friendly policy of Franke all our wooden food preparation platters are made from sustainable forests, and are FSC Certified. The FSC is an independent organisation that sets the standards for environmentally responsible forest management.

Franke sinks have a 50 year guarantee against manufacturing defect. Franke taps are guaranteed against defective materials and workmanship for 1 year in relation to coatings and finishes, and 5 years in relation to moving parts. Franke will replace (and where appropriate repair) defective sinks. In relation to taps, Franke will, where appropriate, provide replacement parts for your taps or replace your taps at their discretion. Any associated or ancillary costs to be incurred by you as a result of replacement of Franke sinks and taps under this guarantee shall in all cases be previously approved by Franke UK Limited. This guarantee is in addition to and does not affect your statutory rights. Prices shown are UK mainland prices effective from 1st March 2010 and include VAT at the current rate of 17.5%. This literature has been produced on chlorine free materials harvested from sustainable forests. The Franke policy is one of continual improvement and Franke reserves the right to alter models and specifications without notice. Front cover shows Alpina APX 611 sink and Zurich Chrome tap.
