Innovative designs with style

KITCHEN
SYSTEMS

FRANKE

Planar PPX 611 sink with Planar Chrome tap

WITH THE FRANKE SPECIALIST RANGE, WE HAVE DRAWN UPON ALL OF OUR EXPERIENCE TO CRAFT AN INSPIRATIONAL COLLECTION THAT COMBINES DESIGN EXCELLENCE WITH STYLE.

This superb choice of state-of-the art sink designs is offered in a wide range of durable materials, shapes and sizes. Whether you seek a cutting edge contemporary or modern classic look, a selection of elegant taps is available to fully complement each individual style.

Franke has been at the forefront of kitchen sink innovation since the company was founded in Switzerland almost a century ago. Since then we've established efficient and economic manufacturing facilities all around the world. These allow us to offer competitively priced products and still maintain immaculate standards of design, production and high-grade materials.

Coordinating Designer Packs

To make our quality even more affordable and to help you choose from the extensive Specialist Range, we've devised coordinating Designer Packs. Each pack comprises a sink, a complementary tap, and in some cases matching accessories to form the perfect package. However, we still want to offer you as much flexibility as possible, so feel free to select the tap of your choice from the full range shown on pages 38-49.

Peace of mind with Franke quality

We have absolute confidence in the unparalleled quality of our sinks. That's why we offer a 50 year guarantee against any manufacturing defects.

STAINLESS STEEL INSET SINKS

Immaculate in both form and function

Made from premium quality chrome nickel steel – the perfect material for ensuring cleanliness and hygiene. These sinks look beautiful, are resistant to staining, chipping, rust and corrosion.

- Available in a variety of styles to suit your kitchen
- Hard-wearing and hygienic
- Sleek, elegant styling
- Shown with complementary tap designs

- Hardwearing, toughened glass
- Shown with complementary tap designs

Franke Kubus glass sinks are made from toughened glass and are able to cope with even the most demanding hardwearing environment. Perfect for that modernistic, aesthetic statement in the kitchen, the highly reflective perimeter surface and matt drainer area are available in either sleek Black or Aqua tones. They're clearly the last word in elegance. For more information and demonstration video visit www.franke.co.uk

Kubus

KBV 611^{DP} Glass & Mythos MTX SilkSteel tap

Revolutionary use of materials combining the hygienic qualities of stainless steel with the superb aesthetics of toughened glass. This single bowl model is easily accommodated in a 500mm cabinet. Available in Aqua or Black to complement many appliances. Includes pop-up waste.

FRAGRANITE INSET SINKS

Solid performance

- Highly durable
- New improved surface smoothness
- Shown with complementary tap designs
- Modern, minimalist Mythos range of Fr granite sinks

NOW INCLUDES

**Fr granite
DuraKleen®
Plus**

Fr granite is a unique material pioneered by Franke that contains 80% tough granite particles to resist burns, dents, chips and stains. Naturally textured, warm to the touch and with a subtle sheen, available in contemporary colours with matching accessories.

DuraKleen® Plus

Revolutionary new DuraKleen® Plus technology is now available on all Franke Fr granite and SilkSheen Fr granite sinks, which now enjoy ultra-smooth surfaces that are exceptionally easy to keep clean.

Mythos

MTG 651^{DP} Fr granite & Mythos MTG Onyx* Chrome tap

CERAMIC SINKS

Classic style with a modern twist

- Modern or traditional styles
- Mythos range available in white or contemporary black options
- Shown with complementary tap designs

Made from kiln-fired porcelain for a tough, smooth gloss finish able to stand up to even the harshest treatment. Franke Ceramic sinks have a fingertip-smooth high-gloss finish designed to look perfectly pristine – even after years of loyal and hard-working service.

Mythos

MTK 611^{DP} Ceramic & Mythos MTX Chrome tap

UNDERMOUNT SINKS

Understated sophistication

- Designed to be undermounted in solid work surfaces
- Wide variety of shapes and sizes to suit your kitchen
- Shown with complementary tap designs

Particularly pleasing when combined with solid granite, wood or solid surface worktops, undermount sinks allow for smooth, uninterrupted surface lines. These sinks are fitted underneath the worktop cut-out so that the sink edge doesn't rise above the level of the work area. Franke Undermount sinks are available in single, double and multi-bowl configurations in a wide range of shapes and sizes.

NEW Peak

PKX 110 18 + PKX 110 55^{DP} Stainless Steel & Bern Chrome tap

The very latest generation of undermount sinks with pressed bowls and tight 5mm corner radii for good-looking, super hygienic workstations. Includes NEW Square Basket Strainer Waste, with the added advantage that the 90mm waste below still accepts a Franke Turbo Waste Disposal Unit if required.

UNDERMOUNTED INSTALLATION GUIDE

Installing your undermount sink

A template and fixing clips are provided in the sink box. Some circumstances may allow for fitting a bowl directly to the worktop. We would recommend the use of a sealant between the flange of the sink and the worktop to avoid any water ingress. In all cases you are advised to consult your supplier.

Alternative fixing systems

Templates provided

*VBK 160, VBK 110 21 & VBK 110 33 cannot be fitted with a reveal due to unglazed flange.

Stainless Steel undermount profiles

Ceramic undermount profiles

FRANKE G-CLIP

The next-generation installation system

The patented Franke G-Clip system is a revolution in the installation of undermounted sinks, with considerable time savings. With this system you will see no visible difference from traditional fixing methods, whilst gaining the benefits of less installation time and effort required.

The innovative technology distributes weight from the sink bowl laterally through the use of simple metal clamps that can be fitted in minutes and are strong enough to withstand more than a 100kg weight. The application of sealant ensures a watertight seal, with the G-Clip system firmly holding the sink in place.

G-Clips can easily be removed with a simple tap from a hammer. For more information and demonstration video visit www.franke.co.uk/gclip

FRANKE ROLLAMAT

Truly versatile, the Franke Rollamat is an essential accessory for every kitchen

This multi-purpose item can help protect sink and kitchen surfaces and is extremely useful for hot pans, heavy objects and for defrosting food items. It also provides the ideal draining surface for modern flat draining areas on minimalist sinks and can be easily rolled up and conveniently stored away after use. This flexible little helper is dishwasher safe and will be a welcome addition to any hardworking kitchen.

Spray

(1) Ceramic disc tap – may require a 4 metre head of water in a conventional plumbing system. (2) Compression valve tap – usually suitable for any plumbing system. In some instances, pull-out nozzle and spray taps may require additional pumping or local authority approval prior to installation.

Franke strongly recommends that you consult your supplier/installer prior to purchase.

 The figure in the symbol is designed to indicate the relative flow rate performance for each tap. The rate is graded 1-8 where 1 is poor and 8 is excellent. Relative flow rates are only likely to be relevant in installations with a low head of water (below 4 metres) or low cold supply pressure. In either case you would be well advised to consult your supplier or installer.

All Franke taps are designed to conform to Water Research Council requirements and are backed by nationwide servicing and guarantees.

 Indicates tap is fitted with a Perlator® providing a champagne-like flow.

SPECIALIST TAP RANGE

The Franke Specialist tap range is a technically and aesthetically advanced collection.

Featuring the new pull-out spray taps Alpha, Arena and Aria and including the innovative Rolux pull-out tap with LED lights, now also available in black finish.

Franke Triflow Tradition SilkSteel tap

FRANKE TRIFLOW

The patented Franke Triflow delivers water in separate channels – dispensing hot, cold, mixed or filtered.

Combining the considered beauty of our most stylish designs and the technologically advanced ceramic water filtration system of the Franke Triflow family, the products in the Franke Specialist range are the perfect addition to any modern kitchen.

These desirable taps are a stunning complement to many of the Franke sinks in the range, creating a coordinated look with effortless style. The Franke Triflow taps in the Specialist range deliver hot, cold and filtered water using an advanced ceramic cartridge. This water filtration system is protected by a robust stainless steel housing on all Specialist Franke Triflow taps, adding reassuring durability to elegant aesthetics.

In some instances, pull-out nozzle and spray taps may require additional pumping or local authority approval prior to installation.
Franke strongly recommends that you consult your supplier/installer prior to purchase.

1 The figure in the symbol is designed to indicate the relative flow rate performance for each tap. The rate is graded 1-8 where 1 is poor and 8 is excellent. Relative flow rates are only likely to be relevant in installations with a low head of water (below 4 metres) or low cold supply pressure. In either case you would be well advised to consult your supplier or installer.

All Franke taps are designed to conform to Water Research Council requirements and are backed by nationwide servicing and guarantees.

Franke Trispray Tradition Chrome tap

FRANKE TRISPRAY

All the superb benefits of Franke Triflow with an added feature, the Franke Trispray system is for kitchens that demand that little bit more.

The precision engineered taps of the Franke Trispray range boast the full complement of features that are present in the Franke Triflow range – including its advanced water filtration system – but also offers an additional side spray which is usually fitted into a solid surface worktop. The standard length of hose for the hand spray is 1 metre, however the amount that the hose will pull out is determined by the position of the hand spray in the worktop.

The ideal hygienic kitchen solution, the spray is perfect for rinsing food as part of meal preparation and dispenses hot, cold or mixed water from the main supply. Each spray is also specifically designed to reflect the aesthetic of the particular tap that it accompanies.

Recommended minimum hot pressure for Franke Trisprays is 1 bar.

(1) Ceramic disc tap - may require a 4 metre head of water in a conventional plumbing system.
In some instances, pull-out nozzle and spray taps may require additional pumping or local authority approval prior to installation.

Franke strongly recommends that you consult your supplier/installer prior to purchase.

The figure in the symbol is designed to indicate the relative flow rate performance for each tap. The rate is graded 1-8 where 1 is poor and 8 is excellent. Relative flow rates are only likely to be relevant in installations with a low head of water (below 4 metres) or low cold supply pressure. In either case you would be well advised to consult your supplier or installer.

Franke Little Butler 2000 Chrome

FRANKE LITTLE BUTLER

Forget waiting for the kettle to boil. With the Franke Little Butler hot water tap, near-boiling water for tea, coffee, soups and cooking is at your fingertips whenever you need it.

Convenient, simple and easy to operate, the Franke Little Butler is the perfect sink-side addition for a busy kitchen. The Franke Little Butler 2000 offers all the features of the Franke Little Butler 1000 but with two levers and has the added advantage of dispensing perfectly filtered drinking water on tap.

Enjoy freshly filtered water free of contaminants, impurities and bad odours. Compact and unobtrusive, the easily replaceable cartridge's unique properties remove bacteria, contaminants, cysts, chemicals and odours. You can have both steaming hot and filtered water – right at your fingertips.

WASTE DISPOSAL UNITS

A choice of four units designed to free the kitchen of unsightly and unhygienic organic household waste. Each unit is the essential add-on for ensuring that all Franke appliances and work surfaces remain looking immaculate.

Thanks to a unique, permanent magnet motor, Franke Turbo Waste Disposal Units reach high speed in a split second, producing more torque per kilo than any other of its type. Whilst running water through the unit, food waste is instantly liquefied into fine particles that are easily flushed through the pipework system.

*Continuous Feed models are operated by an Air Switch (or alternative) and waste food is fed through the open neck of the unit.

**Batch Feed model is activated by loading the chamber and rotating the WDU plug.

In both cases, a continuous supply of water is necessary whilst the WDU is in use. Member of REPIC for WEEE Regulations. EEE Producer Registration Number - WEE/DG0059TT.

†NB. Ensure WDU dimensions can be accommodated within the specified cabinet width, see also page 68.

FRANKE WASTE SORTERS

Our aim to bring Franke excellence to every aspect of the kitchen continues with the introduction of more options to aid with the environmentally friendly sorting and disposal of household waste.

SOFT-CLOSE DRAWER SYSTEMS

The Franke 350 Series Waste Sorters have been designed to be installed into modern soft-close drawer systems including Blum (Tandembox), Hettich (Quadro V6) and Grass (Nova pro)*.

54 *NB. Sorter 350-50 and 350-60 models can only be used in conjunction with soft-close drawer systems, ie. not suitable for standard cabinets. When fitting under the sink (particularly undermounts) ensure that the dimensions can be accommodated.

As separating household waste into recyclable groups becomes more of a green lifestyle necessity, Franke Sorter systems are a useful addition to any kitchen, fitting neatly into most 500mm and 600mm cabinets. Franke waste systems feature separate plastic containers to sort domestic waste into different categories such as food, cans, plastic and paper, which can then be systematically disposed of or recycled. A lid closes over the bins to contain any odours. Franke Sorters are the natural alternative to the conventional waste bin.

NB. When fitting under the sink (particularly undermounts) ensure that the dimensions can be accommodated.

STANDARD DOOR SYSTEMS

The Franke 700 Series Sorter Systems are a useful addition to any kitchen with standard doors, fitting neatly into 500mm and 600mm kitchen base units. With both pedal-operated and hand-operated versions available, Franke Sorters are the natural alternative to the conventional waste bin. The 700 Series is available as either a foot-activated 'KickMatic' model or the easy-to-use hand-operated 'Motion' soft-close mechanism. Each bin has a handle that can also be used to secure waste bags. The roll-out carrier is fully waterproof, simple to dismantle and easy to clean.

(1) Ceramic disc tap – may require a 4 metre head of water in a conventional plumbing system. (2) Compression valve tap – usually suitable for any plumbing system. In some instances, pull-out nozzle and spray taps may require additional pumping or local authority approval prior to installation.

Franke strongly recommends that you consult your supplier/installer prior to purchase.

 The figure in the symbol is designed to indicate the relative flow rate performance for each tap. The rate is graded 1-8 where 1 is poor and 8 is excellent. Relative flow rates are only likely to be relevant in installations with a low head of water (below 4 metres) or low cold supply pressure. In either case you would be well advised to consult your supplier or installer.

All Franke taps are designed to conform to Water Research Council requirements and are backed by nationwide servicing and guarantees.

 Indicates tap is fitted with a Perlator® providing a champagne-like flow.

NB. No reliance should be placed on dimensions given, which are for guidance only. For full specifications on all Franke products visit www.franke.co.uk

Decorative Hoods Brochure

994.0155.991

All the Franke hoods in one brochure – high performance appliances with precision engineering. Franke hoods make a stunning addition to any modern kitchen.

Downloadable and available on request

All brochures are downloadable from www.franke.co.uk or phone the consumer brochure line **0161 436 0209** to get your copy now.

Colours shown are for reference only. All sinks available with left or right hand drainer. The description 'reversible' means that the design enables the same sink to be turned to drainer on the left or drainer on the right. In the case of a 'handed' sink it is necessary to specify which side the drainer is required e.g. ARX 654 left hand drainer or ARX 654 right hand drainer. All bowls sizes and dimensions are described in mm.

In line with the environmentally friendly policy of Franke all our wooden food preparation platters are made from sustainable forests, and are FSC Certified. The FSC is an independent organisation that sets the standards for environmentally responsible forest management.

50 Year Guarantee Franke sinks are guaranteed against manufacturing defect for 50 years. Franke taps are guaranteed against defective materials and workmanship for 1 year in relation to coatings and finishes, and 5 years in relation to moving parts. Franke will replace (and where appropriate repair) defective sinks. In relation to taps, Franke will, where appropriate, provide replacement parts for your taps or replace your taps at their discretion. Any associated or ancillary costs to be incurred by you as a result of replacement of Franke sinks and taps under this guarantee shall in all cases be previously approved by Franke UK Limited. This guarantee is in addition to and does not affect your statutory rights.

Prices shown are UK mainland prices effective from 1st March 2010 and include VAT at the current rate of 17.5%. This literature has been produced on chlorine free materials harvested from sustainable forests. The Franke policy is one of continual improvement and Franke reserves the right to alter models and specifications without notice. E & OE.

Member of REPIC for WEEE Regulations. EEE Producer Registration Number - WEE/DG0059TT.
